After signing up, you will directly receive login details.

**About this webinar:** The future of industry is not on the horizon - it's unfolding now.

Quantum technologies, AI, and next-gen computing are already transforming industries and creating new competitive frontiers with unprecedented opportunities. But how do we bridge the gap between innovation and impact?

In this keynote, Damir shares the bold vision behind QuantumBasel —Switzerland's first quantum and AI hub strategically positioned at the uptownBasel innovation campus.

He'll explore how QuantumBasel is driving innovation through real-world quantum and AI projects that empower industries by bringing quantum education and applications to enterprises including seamless access to quantum, GPU, and classical computing power.

This is more than tech – it's about redefining the economy of tomorrow.

**About the webinar series:** The «CEE-Swiss Impulse Sessions» is a monthly series of short webinars on exciting, current and relevant topics concerning Switzerland and Central Eastern Europe (CEE). It is delivered by outstanding speakers from many different backgrounds. The webinar series aims at inspiring, informing and connecting a diverse audience across industries and functions and thus advance the manifold relationships between Switzerland and all CEE countries. Initiated in 2021 by the Chamber of Commerce Switzerland Central Europe (SEC) in Zurich, this is a joint project of all chambers of commerce in the CEE region and SEC.

**More information about our keynote speaker:**

**Damir** is a sought-after speaker on quantum tech, AI, and digital strategy. Damir Bogdan is the CEO of QuantumBasel, where he leads pioneering real-world projects across industries. He is also the founder of Actvide AG, a consultancy focused on digital transformation for C-level executives in Switzerland and Silicon Valley. Previously, Damir was CIO and Head of Operations at Raiffeisen, Switzerland's third-largest banking group, and Chairman of the European cooperative banking CIOs. His earlier roles include Swisscom's strategy group and founding a nearshore development company. Damir serves on multiple boards in healthcare, tech, and industry, advises the University of St. Gallen, and is active in startup juries in Switzerland and Silicon Valley. He holds an Executive MBA (SUNY), IT Management diploma, leadership training from LBS, and certificates from Harvard, MIT, and Singularity University.
